Sa Font Seca

FINISHED PROJECT 2023

Design Concept

Situated in a quiet residential area, the Sa Font Seca house brings a sophisticated combination of modern living intertwined with texture, warmth, raw simplicity, and earthy luxuriance.

We worked on the idea of 'landscaped architecture', by blurring the boundaries between interior and exterior, integrating the building into the nature. As a result, the house appear to be a part of the land itself sometimes disappearing within it, and then at other times, emerging from it. An open and poetic dialogue between nature and architecture...

SA FONT SECA

Let your home reflect your unique
personality and style as you explore

COLOUR PALET

Elevate Your Environment

For this interior design project, we choose some of the finest quality, honest, earth-drawn materials and textures that create an impression of harmony between the house and nature itself.
